[1] for the period ended December 31, 2023. [2] Distribution Reinvestment Plan ("DRIP") is available, allowing investors to reinvest cash distributions, provided that the Advisor's brokerage firm supports participation in the DRIP. Cash distributions are declared at the sole discretion of the manager and are not guaranteed. [3] At least once each year, the Fund will distribute all net taxable income to investors. These distributions will either be paid in cash or reinvested in the Fund, as may be determined by the Manager from time to time. These distributions will consist primarily of distributions received from the securities held within the Fund less Fund expenses, plus any realized capital gains generated from securities transactions within the Fund. The amounts of past distributions are shown above. The characterization of distributions for tax purposes (such as dividends, other income, capital gains etc.) for each period will be reported only after the Fund's tax year end. For tax purposes, these amounts will be reported by brokers on official tax statements. [4] The yield is determined by annualizing the fixed distribution rate and does not include any distributions in excess of the fixed distribution rate that may be paid at the ETF's year end. [5] All investments involve risk. The value of the Fund can go down as well as up and you could lose money. The Manager has rated the risk of this Fund based on industry standard risk rating guidelines. For more information about the specific risks of this Fund and its risk rating, see the fund's prospectus, including the disclosure under the headings "Risk Factors" and "Risk Ratings of the Funds".
