WHY INVEST IN DYNAMIC AMERICAN FUND ?

- A flexible Fund that employs a bottom-up investment process to participate in a broad variety of opportunities in the U.S.
- A high active share measure means the Fund has a low correlation to the index and many competitor funds, and could be a diversifier in most portfolios.
- Access to one of the world's deepest and broadest markets through true active management.

The benchmark used for analytics for this fund is S&P 500 Index (C\$).

[1] Name change effective November 18, 2016. Formerly Dynamic American Value Fund. [2] For the period ended 2023-06-30. [3] Active share measures the percentage a portfolio's holdings that are different from those in its benchmark. Active share shows how the manager is actively exploiting opportunities that are not reflected in the index. [4] We review the amount of the distribution in January of each year. [5] The yield is determined by annualizing the fixed distribution rate and does not include any distributions in excess of the fixed distribution rate that may be paid at the fund's year-end. [6] Risk rating measures the degree of uncertainty that an investor can handle regarding fluctuations in the value of their portfolio. The amount of risk associated with any particular investment depends largely on your own personal circumstances including your time horizon, liquidity needs, portfolio size, income, investment knowledge and attitude toward price fluctuations. Investors should consult their financial advisor before making a decision as to whether this mutual fund is a suitable investment for them. [7] Not available for purchases, switches out only.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing.

The indicated rates of return are the historical annual compounded total returns including changes in units [share] value and reinvestment of all distributions [dividends] and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. The rates of return are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values of the mutual fund or returns on investment in the mutual fund. Investments in mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

R² is a measurement out of 100 that shows the extent to which a portfolio's movements can be explained by the benchmark's movements.

Standard deviation is a measure of volatility; it shows how broadly the Fund's returns have varied over a given time period.

Active share measures the percentage a portfolio's holdings that are different from those in its benchmark. Active share shows how the manager is actively exploiting opportunities that are not reflected in the index.
