WHY INVEST IN DYNAMIC ALPHA PERFORMANCE II FUND ?

- By actively managing its long, short, and cash positions, the Fund aims to generate positive returns – regardless of the overall direction of the market.
- By seeking to achieve low correlation to traditional assets, the Fund offers the potential for enhanced portfolio diversification and mitigated downside risk.
- The Fund's low correlation to traditional assets and selective short selling has the potential to deliver more consistent returns and reduced portfolio volatility.

The benchmark used for analytics for this fund is HFRI Equity Hedge Total Index (C\$(M).

[1] For the period ended 2023-06-30. **[2]** We review the amount of the distribution in January of each year. **[3]** The yield is determined by annualizing the fixed distribution rate and does not include any distributions in excess of the fixed distribution rate that may be paid at the fund's year-end. **[4]** Risk rating measures the degree of uncertainty that an investor can handle regarding fluctuations in the value of their portfolio. The amount of risk associated with any particular investment depends largely on your own personal circumstances including your time horizon, liquidity needs, portfolio size, income, investment knowledge and attitude toward price fluctuations. Investors should consult their financial advisor before making a decision as to whether this mutual fund is a suitable investment for them.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing.

The indicated rates of return are the historical annual compounded total returns including changes in units [share] value and reinvestment of all distributions [dividends] and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. The rates of return are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values of the mutual fund or returns on investment in the mutual fund. Investments in mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Standard deviation is a measure of volatility; it shows how broadly the Fund's returns have varied over a given time period.
